# Exposure to Fecal Effluents leads to Infection

Existing solutions can lead to skin breakdown and spread of nosocomial infections, leaving both patients and HCPs at risk

## EXPENSIVE COMPLICATIONS

**CDI**

*Clostridium difficile*  
Infection

**\$29,000<sup>1</sup>**

**CLABSI**

Blood Stream  
Infection

**\$23,242<sup>2</sup>**

**CAUTI**

Catheter Associated  
Urinary Tract Infection

**\$1,006<sup>3</sup>**

**HAPI**

Hospital Acquired  
Pressure Injury

**\$21,410<sup>4</sup>**

Direct & indirect costs of HACs from fecal bacteria are estimated to cost hospitals up to  
**\$1.8 Billion Annually**

**Infections are controllable  
Contain costs and complications**

*Engineered to safeguard patients and healthcare providers  
from HACs due to fecal contamination.*
