every day

Qoramatic[®]
Automated Stool Management

One of its kind fecal management system that proactively diverts fecal effluents using negative pressure suction

Zero radial pressure

Eliminates rectal trauma. Superior patient comfort, no sensation of 'fullness'

No over-inflation

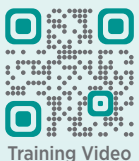

No inflatable balloon; no sphincter injury, even in case of tugging or accidental expulsion

Infection Prevention

Reduces HAC-HAI. Improves clinical outcomes and reduces CMS penalties.

Proactive fecal diversion

Minimizes leakage. Automated irrigation, milking, & maintenance reduce nursing burden
